

WinVision 9mm is a lightweight modular indoor LED screen providing an innovative solution for your next production. It offers a level of visual depth and image quality to enhance any creative experience. It's lightweight yet firm structure, concave, curve capability and removable blackout panels allow for design flexibility in creative applications. WinVision 9mm provides full HD processing and superior color uniformity. It's modular structure can be assembled in a wide variety of screen sizes and can be used with nearly any video graphics source. It is easy and simple to install, use and dismantle making it ideal for premier indoor concerts, staging events, audio shows and conventions.
